

Bitsia: Your reliable software partner

Bitsia is a web development company delivering e-business solutions that fits you're most complex needs.

We specialise in making modern, simple, easy to use and **top quality** web applications that your customers will love to use.

While anyone can make simple things complicated, it takes a lot of skill to make the complex appear simple. Our user-centred philosophy means that all of our software solutions are intuitive and easy to understand.

The team that makes up Bitsia is a blend of talented young programmers and experienced IT professionals who are passionate about their work and know how to do it well. Bitsia's specialists help clients to implement successful projects on time and on budget by providing expert advice, goal-oriented project management and high-quality software development.

Custom software solutions and systems integration in the finance, insurance and e-commerce has helped establish Bitsia's excellent reputation.

What we do

Our main focus area is customized web applications development in the fields:

- Financial Services and Insurance
- E-Commerce
- Customer Relationship Management
- Database Development

We will produce the requested application or software module quickly and cost efficiently. We are proficient and can do quality programming using **Java** and **PHP** as main technologies.

We practice layered application development utilizing new technologies like: Java Servlets, JSP, Struts, Tiles, Hibernate and XML for backend engine, HTML, CSS, JavaScript and Flash for front end. Our DBMS of choice is Oracle.

We constantly research for new solutions and keep our know-how up-to-date.

Services
